Stonil™

Capsule

Kidney is very vital organ of body because it considered as the master chemists of the body. It regulate water, remove wastes and balance body's chemicals. Kidneys help build bones and produce hormones.

The kidneys regulate levels of fluid, minerals, salts, and other substances in the body. When the balance of these compounds changes, kidney stones may form. There are four types of kidney stones, each made of different substances. Uric acid and cystine are two compounds that may comprise kidney stones. Factors known to increase the risk of kidney stones include dehydration, family history, genetics, and the presence of certain medical conditions. Having one or more family members with a history of kidney stones increases the risk of the condition.

Stonil Capsule is an effective natural herbal remedy for complications related to Kidney problems such as Urinary Stone, Repeated stone formation, Urinary tract infection etc.

Tribulus terrestris (Gokshur)
(Saponin 30%) : 130 mg

- Gokshura has an anti lithiatic feature which means it prevents the growth of kidney stones.
- It is helpful for curing diseases related to the urinary tract. It is effective treatment for most urinary tract disorders as it promotes flow of urine, has a soothing effect on the membranes of the urinary tract and works to stop the bleeding.
- Gokshura is considered as a rejuvenating herb for the urinary system. It aids in treating urinary tract infections, bladder infections etc. by effectively flushing toxins out of urinary systems.

Zingiber officinale (Sunthi)
(Gingerol 2.5 %) : 60 mg

- Ginger prevents kidney stones by keeping body hydrated. The more fluid your kidneys have access to, the more they can expel toxins through urine. In short, proper urine volume helps clear the kidneys of stone-causing minerals.
- Ginger also contains citrate, which helps prevent the formation of stones.
- Ginger root is delicious, anti-inflammatory, anti-parasitic, anti-viral and anti-bacterial natural medicine. It's the ultimate natural tool for all diseases. Ginger root is known to improve discomfort and can even improve immunity and make your cardiovascular system healthier

Herbal remedy for healthy urinary tract....

Crataeva nurvala (Varun)
(Tanin 1 %) : 80 mg

- The main health actions of Varun are diuretic, antilithiatic, rubefacient and anti-inflammatory.
- Crataeva nurvala is one of the best litholytic herbs (ability to break up stones).
- Scientific research has indicated that a constituent of varuna, lupeol, deactivates the enzyme glycolate oxidase, reducing the body's production of oxalates which combine with calcium to form Kidney stones.
- It is used as a natural diuretic as it also could hinder kidney stones formation.s to increase the sex drive in the bodies of the males.

Tinospora cordifolia
(Guduchi)(Bitter 3 %) : 60 mg

- It is useful in interstitial cystitis, burning sensation in urine, oily or sticky discharge in urine, dysuria etc.
- Guduchi strengthens the urinary system and increases the resistance of inner layers of bladder and urethra to fight repeated urinary tract infections.
- Guduchi helps to purify blood and expel the toxins which are circulating in it. Because of this property it is useful in gout to control blood uric acid level.

Piper cubeba (Kankol)
(Bitter 1%) : 35 mg

- It is effective in toning up of the urinary tract.
- Kankola helps the passing of urine. For people suffering from urine retention, taking the tea made with Kankola is the best cure.
- It also helps break urinary stone and flushes out from the tract.

Butea monosperma (Palaspuspa)
(Bitter 1%) : 40 mg

- Flowers have astringent, anti diarrheal, anti cancer, hepato protective, anti oxidative, expectorant, diuretic, anti inflammatory, anti gonorrheal, tonic, aphrodisiacal and emmenagogue properties.
- They are also depurative, remove swelling and promote menstrual flow, prevent pus formation in urogenital tract of males. Extracts of flowers have free radical scavenging activity. They also have strong chemo protective effect.

Asfoltum punjabinum (Shuddha Shilajit)
(Fulvic acid 2 %) : 20 mg

- It is utilized to treat all sorts of male health disorders, which are related to the genital-urinary system. It is even used for treating the inconvenience in urination because of the enlarged prostate gland. Shilajit is known to be helpful in other problems also like kidney stones, bladder stones etc. This is one of the valuable pure Ayurvedic medicines that is used in treating enlarged prostate gland and it has been proven to enhance the sexual power in males to a certain extent.
